

Mashed fruit mix

When starting on mashed fruit mix: add milk food to taste. Once your baby can take the mashed fruit mix on its own, there is no need to continue adding milk food.

Fruit: well ripened and in adequate variety.

Non-flavoured infant cereal or infant rusk:

- Glutens may be gradually used from (4 -) 6 months, irrespective of breast-feeding or artificial feeding.
- Use infant cereal or infant biscuits (rusks) suitable for infants to thicken the fruit puree (**is not always necessary!**).

Recipe for half mashed fruit mix:

a few tablespoons of cereal or ½ rusk (there are usually 2 per pack)

fruit: mash ½ a grated apple or ½ pear or ½ kiwi or ½ banana or a small piece of melon etc. Or a mixture of fruits.

fruit juice: fresh juice of ½ orange or ½ grapefruit (juice may be strained or even diluted with water)

If it goes well, increase the amount to ¾ and finally to 1 (a full portion of mashed or pureed fruit).

Fruitpap

Bij start fruitpap: aanvullen met melkvoeding volgens behoefte.

Neemt baby volledige fruitpap, is aanvulling melkvoeding niet meer nodig.

Fruit: goed rijp en voldoende variëren in soort.

Ongezoet kindermeel of kinderkoek:

- Glutens mogen vanaf (4 -) 6 maanden geleidelijk gebruikt worden, ongeacht borst-of kunstvoeding.
- Gebruik meel of koek geschikt voor zuigelingen om de pap in te dikken (**hoeft niet altijd!**).

Recept halve fruitpap:

enkele eetlepels meel of ½ koek (meestal zitten er 2 in één verpakking)

fruit: ½ geraspte appel of ½ peer of ½ kiwi of ½ banaan of stukje meloen enz. Je mag ook fruitsoorten combineren.

fruitsap: vers sap van ½ sinaasappel of ½ pompelmoes (het sap mag gezeefd zijn of eventueel verdund met water).

Gaat dit goed, verhoog de hoeveelheid tot ¾ en uiteindelijk tot 1 (een volledige fruitpap).
